

Anaesthetic Vaporiser Servicing

Est.1996

Medical Supplies & Services International Limited

Knowledge, Quality and Teamwork makes for a great service.

Servicing in this field of work is crucial that's we take pride in ensuring that your vaporiser performs accurately before we return it to you. We follow the original manufactures procedure and specifications at all times, and with our many years of experience we understand the product inside and out. We have serviced vaporisers from America to Australia, and everywhere in-between.

We inspect all parts in details for damage and general wear, clean all internal components and replace all routine parts, as well as any worn and damaged parts with the customer's approval. Followed by a multi-phase calibration for an accurate temperature and flow performance. Upon passing all inspections the unit can be prepared for despatch and returned to the customer.
